

Cleaning Grouted Tile Floors with HOST is Easy & Effective

1. Place red grout brushes on the HOST machine.

Caution: *The red grout brushes should only be used on grout, do not use on carpet.*

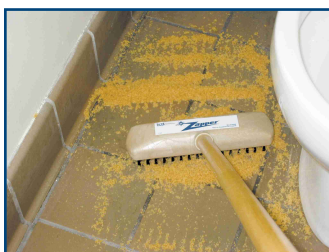

2. Apply HOST SPONGES Dry Carpet Cleaner to the area to be cleaned, about one handful per square yard. Don't apply to more than 500 square feet at a time or the HOST may dry out before cleaning is completed.

3. Brush with the HOST machine as you would on the carpet, north and south and then east and west. The more brushing you do, the better the results will be.

4. Vacuum up the dirty HOST. The grout will be clean and virtually dry. It may appear slightly darker in colour, but it will brighten up within 15-20 minutes as any residual moisture evaporates.

Note: Use the HOST spotZAPPER brush in hard to reach areas.

**Detailed grout cleaning instructions are included with the red grout brushes.
Or call 0151 347 1900 for more details.**

HOST Deep Cleans Grout

The HOST[®] Dry Extraction Carpet Cleaning System Deep Cleans Grout Too!

You know the HOST Dry Extraction Carpet Cleaning System is a simple and effective method for deep cleaning carpet anytime without the inconvenience of getting it wet, but did you know that HOST can also be used to clean grouted tile floors?

Look at the results: the right section of this grouted tile floor was cleaned with HOST!

Cleaning & Maintaining Grouted Tile Floors Can Be A Challenge

- Grout is a porous material that absorbs dirt and grease.
- Grout also absorbs liquids used for cleaning, making removal of the dirt difficult.
- After cleaning, the dissolved dirt can wick back to the surface making the grout look dirty again.

HOST Dry Extraction Carpet Cleaning System Works Great on Grout

- The Liberator[®], Freestyle[®] and Reliant[®] machines counter-rotating brushes scrub the grout and dislodge dirt and grease.
- HOST Dry Carpet Cleaner contains a balanced blend of water, detergents, wetting agents and natural ingredients that dissolve and trap dirt and grease.
- HOST is safe to use because it does not contain bleach or acid and does not emit any noxious fumes.
- Grout is clean and dry as soon as the cleaning is done.
- HOST leaves no chemical residue behind to attract dirt and cause rapid resoiling of the grout.
- For cleaning hard-to-reach areas, use the HOST spotZAPPER[®].

HOST not only has the right equipment & products to deep clean your carpet... but your grout, too!
