TROLLEY
£549.95
inc. VAT

Thanks to purefast[®] pure water cleaning systems, it has never been so easy to clean glass windows and doors, cladding, solar panels, fascias, signs and pretty much any surface efficiently and safely from ground level to over seventy feet high.

Designed by our engineers for easy and trouble free operation, purefast[®] trolleys are made specifically to carry pure water safely around properties and over pathways, lawns, steps, kerbs, ramps and many types of terrain. Each trolley is equipped with pump, pump controller and battery.

Pure water is simply tap water with all minerals removed, so pure water can be left to dry, without leaving any marks on the surface - no squeegee required!
