Pump: SHURflo

Pressure: 0-100 psi (6.9 bar)

Battery: 86Ah

Pump controller: Digital

Weight: 55kg (empty) 455kg (full)

Dimensions: L 110cm W 75cm
H 89cm

Digital FLOWBOX

Thanks to purefast™ it has never been so easy to clean glass windows and doors, cladding, solar panels, fascias, signs and pretty much any surface efficiently and safely from ground level to over seventy feet high.

The purefast™ 250 litre and 400 litre skid units are amazingly versatile and they can be used in all sorts of vehicles and trailers. They are quick release, allowing your vehicle to be used for multiple tasks, a firm favourite with garden maintenance and facilities companies who also clean windows and cladding for their customers. If your vehicle is off the road or you need an additional system, the purefast™ 250 and 400 skid units can be quickly and safely fitted into a hire van, no drilling involved.

A popular option is a removable purefast™ FLOWBOX which allows the battery and pump to be removed for charging or for frost protection. The FLOWBOX can also be used with other systems such as the purefast 125 trolley based window cleaning system.
